Mast mounted camera systems

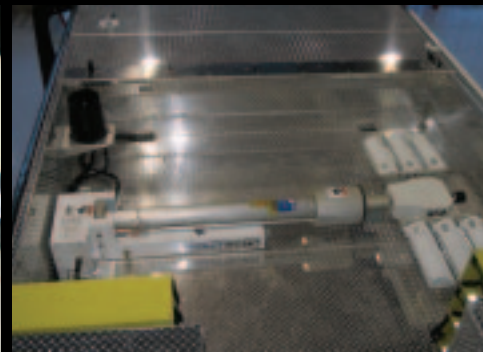

Generator and light tower controls

Dual Command seating with desk

1000 lb rated full extension trays

Recessed roof mount light tower

Under body storage compartments

# RESCUEMASTER® MOBILE COMMAND

These are the typical specifications for the RescueMaster® Mobile Command:

**PRODUCT CAPABILITIES:** The winning combination of an on-site command unit plus a full complement of onboard equipment provides for the total Command Rescue Package.

Extensive Engineering reviews to validate designs and to insure technical compliance. This includes weight distribution, center of gravity, and electrical load analysis.

**CHASSIS:** Medium/Heavy-Duty Commercial Chassis: Freightliner M2, Sterling Acterra. Heavy-Duty Custom Chassis: American LaFrance Eagle® and Metropolitan.

**BODY CONSTRUCTION:** Extruded aluminum: Features all welded roll cage design. Extrusions specifically engineered for emergency vehicle applications.

Body panels are 3/16" aluminum welded to the structural assembly.

Compartments are framed, separated and supported by the welded structural grid.

**FORMED STAINLESS STEEL:** 12 gauge 304L fully welded construction available.

**BODY SUB-FRAME:** A system of underbody structures physically tie the floor, saddles, and outer sidewalls. This creates a unitized shell/sub-frame capable of carrying concentrated loads while offering side wall impact protection.

**COMPARTMENT ACCESSORIES:** All trays, shelves, toolboards have been certified at their particular rating to insure proper application in service.

Roll-up doors with the option of flush hinged doors further permit custom tailoring of compartment access.
